When Pump Knowledge Matters

Our Mission

At Kelair Pumps Australia own mission is to provide our clients with a range of world-renowned, high quality products supported by knowledgeable staff. We take pride in our pump knowledge and 'When Pump Knowledge Matters', our staff are second to none.

Our Vision

To become the natural hub between all facets of industry and the world's leading fluid handling equipment manufacturers.

About Us

Kelair Pumps Australia is a member of the AxFlow Group, the Fluids Handling Solutions business group within Axel Johnson International, and employs over 50 people nationally. Our head office is located in Sydney, with interstate branches in Mackay, Gladstone, Brisbane, Melbourne, Launceston, Adelaide, and Perth.

Full support from concept to completion

DESIGN & SELECTION

Using the latest 3D design software, our team of accomplished engineers work with our clients to provide solutions which meet and exceed industry demands.

PROJECT MANAGEMENT

With over 40 years of history in the pump industry we have a vast amount of project management experience across a wide range of industry sectors and civil projects.

- We provide contract management including suppliers and subcontractors, using the latest project management systems
- Documentation management
- Witnessed and unwitnessed testing at third party or our own test facilities
- Fully managed installation services
- Commissioning and fault finding

MANUFACTURE

Our dedicated workshops and skilled tradespeople offer a range of manufacturing, fabricating, machining and engineering services to our clients. We focus on packaged turnkey pumping equipment for all sectors of industry.

STATE OF THE ART TESTING FACILITIES

We build and test all pumps to ensure they perform to specification in our specialised test facility.

- Testing to AS/ISO 9906:2018
- 185 kW inverter allowing us to test varying speeds
- Flow up to 400 L/s
- Pressures up to 2000 kPa

INSTALLATION & COMMISSIONING

We provide a diverse range of infield capabilities – which includes teams of skilled tradespeople, project engineers and project managers. We are able to install and commission all types of projects, ensuring each job is completed to comply with the client's specific project standards and requirements.

Our experienced site services team ensure proper installation and operation of the equipment in-situ:

- Comprehensive pre-delivery site inspection
- Pre-delivery pump performance tests
- Laser alignment of pump sets
- Correct set-up, start and logging of operational characteristics
- Onsite performance verification
- Onsite training of maintenance operatives

SERVICING

Our Service division is fully equipped to respond to any type of service call. We have a national fleet offering a range of specialised services including maintenance and repairs on all makes and models of pumps and control circuits.

When you choose Kelair Pumps for your pump service and repairs, we will earn your confidence through our personal, professional, technical support and our quality repair turnaround.

QUALITY PRODUCTS & BRANDS

Kelair Pumps comprises highly qualified tradespeople with diverse industry experience and expertise. We have a comprehensive range from some of the world's leading brand pumps and have developed a strong network of suppliers and products we trust delivering the highest standards, which enable us to find the right solution for our clients in any industry.

Certified Standards & Sustainable Practice

At Kelair Pumps, we operate with a firm commitment to internationally recognised standards that promote quality, environmental responsibility, and workplace safety.

CERTIFIED
ISO 9001
ISO 14001
ISO 45001

Our ISO certifications are more than just credentials; they are embedded into our day-to-day operations and long-term strategy.

DELIVERING QUALITY EVERYTIME

Quality is central to everything we do. From procurement through to delivery and support, our systems are built to ensure consistency, reliability, and continuous improvement.

Our *ISO 9001:2015 Quality Management Systems* certification is a formal recognition of this commitment. It ensures we meet customer requirements, enhance satisfaction, and maintain the highest standards in every project we undertake.

ENVIRONMENTAL & WASTE MANAGEMENT

We recognise the environmental impact of our business and are committed to operating in a manner that complies with environmental legislation and minimises our effects on the environment.

In particular, we have a strong focus on the prevention and management of pollution resulting from our activities, as demonstrated by our *ISO 14001:2015 Environmental Management Systems* certification.

WORKING WITH SAFETY

Workplace health and safety is an integral part of all our operations, it is at the core of our values and culture.

Our formal certification under *ISO 45001:2018 Occupational Health and Safety Management Systems* reflects Kelair's commitment to safety, quality, productivity, and customer satisfaction

SUSTAINABILITY

Sustainability means securing our future–responsibly. As part of Axel Johnson International, a family-owned business with over 140 years of history, we are guided by a long-term vision and a structured, group-wide sustainability strategy.

Together with our owners, AxFlow and Axel Johnson International, we are committed to operating responsibly through a clear action plan focused on continuous improvement.

We aim to run a resource-efficient and environmentally conscious business. We work to provide our clients with the most energy-efficient solutions available, while also fostering a positive impact within our communities–promoting diversity, social responsibility, and being a good employer wherever we operate.

Past Projects

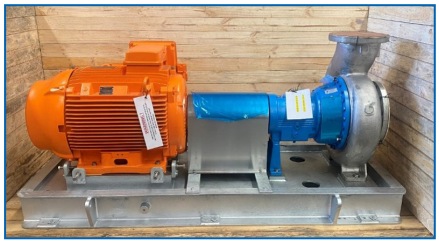

Project: Hydrant Pumps for Western Sydney Airport Fuel Terminal

Saunders International commissioned three API610 hydrant pumps and eight API676 Jet-A fuel pumps for the Western Sydney Airport Fuel Terminal. Kelair provided an end-to-end solution, managing the full pumps package, overseeing QA, supplier coordination, testing, and commissioning. Kelair also designed and assembled two large diesel fire pumps - among the largest ever tested at its Sydney facilities.

Project: Critical Pumping Solution for Snowy Hydro

For UGL Limited at Snowy Hydro's Hunter Valley Gas-Fired Power Station, Kelair supplied and installed four 90 kW cooling water pumps and four 20 Bar booster pumps. Using trusted ITT Goulds 3196 Series pumps, renowned for their durability and global reliability, we delivered a high-performance solution that ensures long-term service life and minimal maintenance for critical infrastructure.

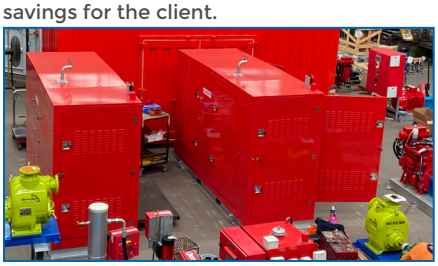

Project: Pumps Set for Biosolids Gasification Facility

Australia's first biosolids gasification facility at the Loganholme Wastewater Treatment Plant, Kelair supplied and installed a custon-engineered Lowara pump set. The system included four eSHF pumps complete with base plates and valves, supporting the plant's advanced thermal treatment process and contributing to sustainable wastewater management for Logan City Council.

Project: Fire Protection Package for Retail Shopping Centre

For this shopping centre upgrade, Kelair delivered a turnkey fire protection solution with AS2941-2013 compliant, pre-packaged diesel pumpsets. Featuring pre-wired, pre-plumbed enclosures, the system eliminated the need for a pump room, reducing installation time, labour, and costs. Our solution met all fire performance requirements, enabling faster project delivery and long-term savings for the client.

Project: Antarctic Remote Water Treatment Solution

Following a request from the Australian Antarctic Division, our team supplied the Mawson Station Wastewater Treatment Plant with a Blivet BL500, along with Albin sludge removal pumps, and Grundfos effluent feed and discharge pumps. The Blivet's compact design, low maintenance needs, and ease of operation made it ideal for remote deployment, offering a reliable and efficient solution in harsh environmental conditions.

Project: Hazardous Chemical Pump Maintenance

Kelair successfully delivers the annual maintenance contract for Australian Petrochemical Storage, servicing over 20 pumps handling hazardous chemicals. The contract covers ANSI B73.1 process pumps along with Sandpiper AODD diaphragm pumps, ensuring safe and efficient operation. Our expertise with both legacy and modern systems supports long-term reliability and performance in demanding environments.

Project: Corrosion Control Skid Package for a Refinery

For the crude unit corrosion inhibitor dosing skids project, Ampol Refineries required four skids, each with three Pulsafeeder PulsaPro 680-SE pumps, 12 in total plus two spares. Kelair supplied 1500-litre HDPE tanks, walkways, steps, fittings, and complete system components, ensuring a site-specific, efficient solution. Kelair's agility and adaptability kept the project on track amid evolving client needs.

Project: Industrial Pumping Solutions and Servicing

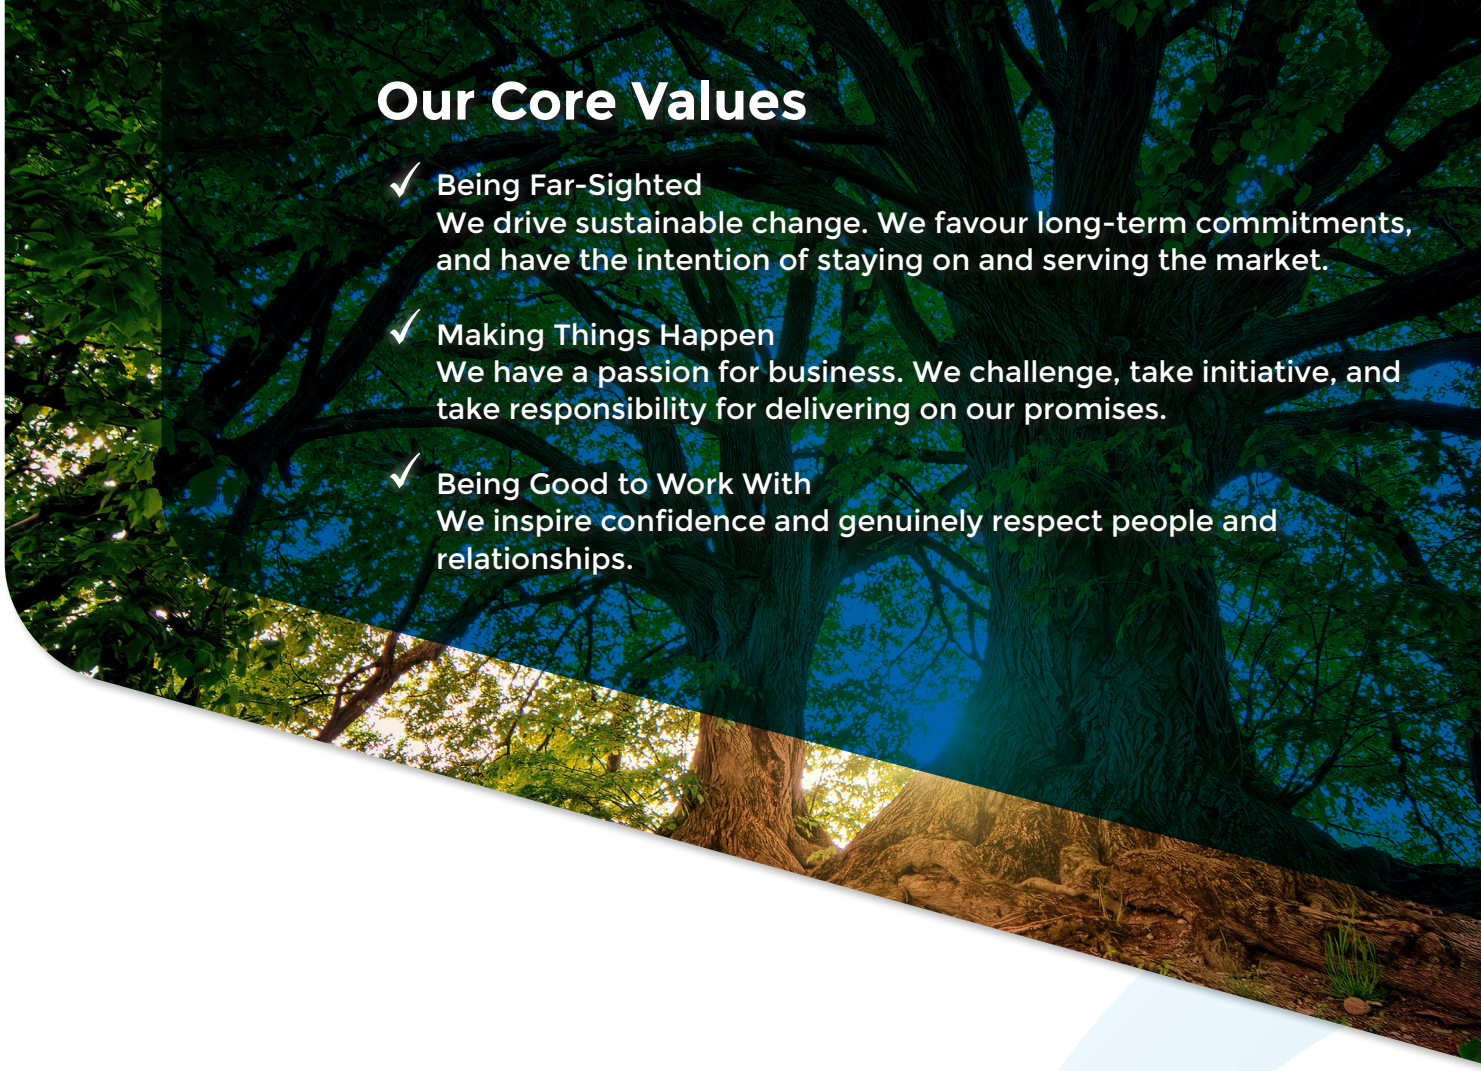

Following a request from a multinational food corporation, Kelair supplies and services multiple Viking internal gear pumps for industrial fluid handling. With extensive local stock, along with our strong technical expertise, we ensured fast turnaround, reliable performance, and minimal downtime supporting the client's operational efficiency and maintaining continuity in critical agricultural and food processing operations.

Project: Containerised Fire Protection Pumpsets for Mine Site

For the Onslow Iron project, Kelair supplied a containerised fire pump built to cyclone standards, offering a cost-effective alternative to on-site structures. We also delivered fully assembled truck wash skids, meeting strict technical specs and saving time and cost. A modified Grundfos MPC-E potable water package was provided, offering efficient pressure control, easier servicing, and reduced lead times.

Our Core Values

- ✓ **Being Far-Sighted**
  We drive sustainable change. We favour long-term commitments, and have the intention of staying on and serving the market.
- ✓ **Making Things Happen**
  We have a passion for business. We challenge, take initiative, and take responsibility for delivering on our promises.
- ✓ **Being Good to Work With**
  We inspire confidence and genuinely respect people and relationships.
