Simpler handling

One package means easier storage and easier physical handling. One part number makes ordering simpler.

Save time

All parts in one box means reduced administration and eliminates the risk of having to wait for delivery of individual parts when you need them most. Simpler logistics also saves time.

Lower costs

Handling and administration costs as well as price per item are all lower when compared to purchasing parts separately.

Fast delivery

When you need service kits, you want them fast. All Flygt basic repair kits are stocked in our distribution centers for direct delivery.

High quality parts

Xylem guarantees that all parts in a basic repair kit are Genuine Flygt Parts or genuine parts from OEM manufacturers.

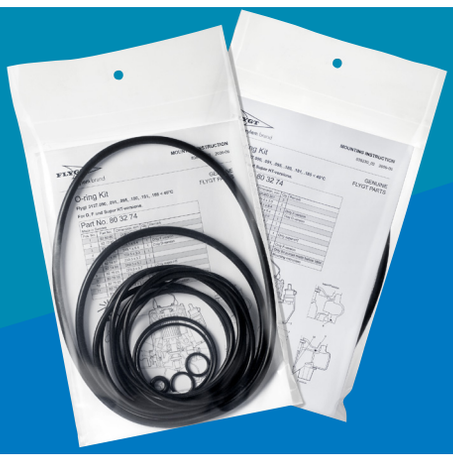

O-rings included

The basic repair kits contain a set of O-rings, which can also be bought separately in O-ring kits.

Service sticker

The kits contain service stickers that should be put on your pump after repairs have been completed. The sticker certifies that Genuine Flygt Parts were used for the repair.

O-ring kits

Flygt O-rings are made to exacting tolerances and assure that your pump delivers optimal performance. With our O-ring kits, you get the right number and correct size of O-rings for your specific pump or mixer – with just one order number. Made of nitrile or fluorinated rubber, our O-rings are specified to seal effectively at both high and low temperatures. The mounting instructions delivered with each kit help you mount the parts correctly.

Assortment

Basic repair kits and O-ring kits are available for most Flygt pumps and mixers. For more information, contact your local Xylem representative.
