

THE NEW RANGE **NCA**

Problems with solids, viscous liquids or wastewater may cause blockages to your installation. SAER's new NCA range will solve these issues: an end suction pump with open or channel impeller. Made in Italy. Quality guaranteed.

STRONG.

Robust end-top casing design with centreline discharge to equalise foundation loadings and rigid feet for reduced vibration. Robust bearing design capable of withstanding maximum axial load for long periods, and high strength stainless steel shaft to provide continuous service.

ADVANCED.

State of the art hydraulic design combining energy savings with a wide free liquid passage.

EASY.

Back pull out design for ease of maintenance. Replaceable wear plate on suction side and adjustable axial gap between impeller and suction wear plate to maintain performances.

RELIABLE.

Available with a wide choice of materials. Various sealing and bearing lubrication options are available to suit the required application.

SAER NCA, designed for longevity in the most severe applications, delivered to you in the shortest time.
