## **MOTOR SPEED PRODUCT LINE** SERIES: 495, 4195 CAST IRON CONSTRUCTION

## **FEATURES & BENEFITS**

- The most compact gear pump series available to fit tight space constraints
- High speed operation for the most economical pump option for thin to moderate viscosity applications
- Vertical mounting options to further reduce the unit footprint

Flange for motor mounting bracket eliminates the need for drive equipment and provides better unit alignment (Mounts available for NEMA & IEC motors)

Sealed anti-friction bearings eliminate the need for relubrication

Threaded one-piece bearing housing allows for end clearance adjustment

> Gauge ports for easy application of gauges or transducers (location varies by pump size)

> > One-piece casing ensures alignment for maximum bearing and seal life

Behind the rotor seal, so shaft and bearings not exposed to media NPT available on G-AL Sizes, ANSI or DIN flanges on KE-QS sizes, enabling easy in-line mounting to almost any piping system

Pressure lubricated idler pin and bushing enhances pin and bushing life (AS-QS sizes)

Expanded feeding area and redesigned head allow for higher speed on KE-QS size pumps (KE-QS pumps are CW only)

VISCOSITY 28 to 15,000 SSU (1 to 3,300 cSt)
