

HAND SANITIZER PRODUCTION

AODD Technology

- AODD is fast / simple to install & powered by air / no electric wiring needed
- Simple versatile construction with the ability to pump very viscous / non-viscous materials
 - Ideal for the mixing of alcohols / gels and transferring products
- Ability to run dry without damaging internal wear parts and excellent suction lift
 - No need to prime or worry if there is interruption of product being pumped

Full Line of FDA / EN1935 Compliant AODD Pumps

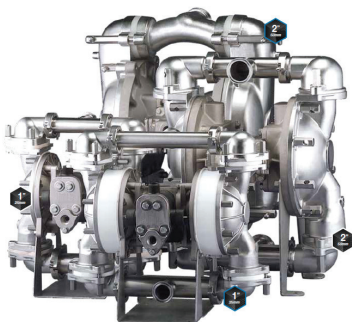

- FDA approved diaphragms and materials
- Ideal for pumping sanitary products like hand sanitizer

ATEX Certified / NFPA 77 Compliant Pumps

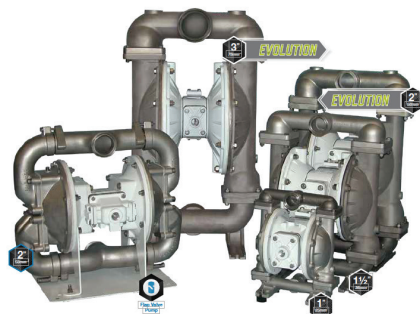

- Necessary for handling alcohol and other flammable products

Unique Pumping Technologies

- In-line air valve serviceability (ESADS)
- Best in class air efficiency (Evolution)

Premium FDA Compliant Pump Line

Standard FDA Compliant Pump Line

A SANDPIPER PROMISE: Supporting Essential Processes
