SERIES DESCRIPTION

Viking's Motor Speed Product Line Series 493 and 4193 steel external pumps are available in capacities up to 75 GPM. These pumps can be furnished directly connected to a 50HZ or 60 HZ motor.

Series 493 is designed for vertical or horizontal flange mount installations where space is at a premium. Series 4193 is designed for foot type horizontal mounting. These pumps are built for continuous or intermittent duty for such applications as filtering, circulating, transferring, or booster service in general industrial, petrochemical and other industries.

They are furnished as standard with mechanical seal construction to minimize liquid loss and for shaft protection. The thrust control provides micrometer adjustments for accurate rotor and shaft positioning to help you keep operating with new-pump efficiency through years of heavy duty service.

**MOTOR SPEED PRODUCT LINE:
STEEL EXTERNALS PUMPS
SERIES 493, 4193**

FEATURES & BENEFITS

- Ball Bearings Standard
 - » Pumps are equipped with inner casing ball bearing installed outside of mechanical seal and a radial thrust ball bearing permitting heavy-duty service up to 250 PSI (17 BAR). Bearings are “Sealed for Life”.
- Integral Over-Pressure Relief Valve Standard
 - » Permits bypassing of liquid from discharge to suction side of pump. Prevents build up of pressure in discharge line. GG, HJ and HL size valve mounts on pump head. AS, AK and AL size valve mounts on pump casing.
- O-Ring Gaskets Standard
 - » O-Ring gaskets are used between casing and head plate and between casing and relief valve or valve plates. Flat valve gaskets furnished on GG, HJ and HL size pumps. These gaskets provide a positive seal eliminating a chance for leak-age at these points.
- Ductile Iron Parts Standard on AS, AK & AL Sizes
 - » Internal pumping gears (rotor and idler) are constructed of ductile iron for added strength in handling all types of liquids up to 15,000 SSU (3,300 cSt). HL size rotor also furnished in ductile iron.

STANDARD MATERIALS OF CONSTRUCTION

Component		Standard Material
Casing		Steel, ASTM A216, Grade WCB
Head		Steel, ASTM A216, Grade WCB
Rotor Shaft		Steel, ASTM A108, Grade 1045
Rotor	GG, HJ	Cast Iron, ASTM A48, Class 35B
	HL, AS, AK, AL	Ductile Iron, ASTM A536, Grade 60-40-18
Idler	GG, HJ, HL	Steel (Powdered Metal) GG: MPIF 35, FN-0208-45 HJ, HL: MPIF 35, FC-0208-50
	AS, AK, AL	Ductile Iron, ASTM A536, Grade 60-40-18
Idler Pin		Hardened Steel, ASTM A108, Grade 1045
Idler Bushing		Carbon Graphite
Pressure Relief Valve		Steel Externals, ASTM A216, Grade WCB
Mounting Bracket (Units Only)		Cast Iron
Seal		Fluoroelastomer (FKM), Carbon / Silicon Carbide

① If suction pressure exceeds 100 PSI (7 BAR), consult factory.

② Standard FKM seal from 0°F to +350°F (-20°C to +175°C). Extra clearances are required above 225°F (105°C).

③ Maximum hydrostatic pressure for standard pump construction. Rating is dependent on seal, gaskets and ports.

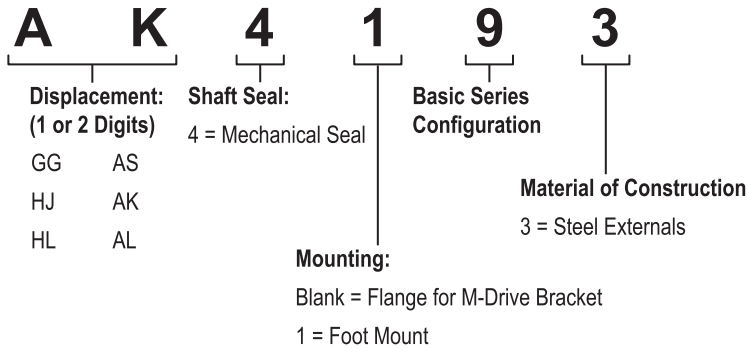

* 250 PSI (17 BAR) for above 100 SSU (20 cSt), 150 PSI (10 BAR) for 38 to 100 SSU (3 to 20 cSt), 100 PSI (7 BAR)) for below 38 SSU (3 cSt)

STEEL EXTERNALS PUMPS
SERIES 493, 4193**

MOUNTING OPTIONS

Flange Motor Mount Units (M Drive)

Pump and motor mounted to a flange mounting bracket with coupling.

Sizes: GG - AL493

For more compact horizontal mounting, the “C” face mounted Series 493 Heavy-Duty pump units in all six sizes include a combination motor “C” flange and square pump flange bracket with coupling connecting motor and pump. The three smaller units connect to a foot mounted motor, while the three larger units include a foot type bracket to mount a flange type motor.

Vertically Inline Mounted (IM Drive)

Pump and motor vertically mounted to a flange mounting bracket with coupling.

Sizes: GG - AL493

Viking’s Series 493 pump line can be mounted either vertically or horizontally to electric motors. Vertical inline mounted unit described on this page comes complete with footless “C” flange mounting bracket and coupling between motor and pump.

Direct Drive (D Drive)

Pump and motor mounted on a base with coupling and coupling guard.

Sizes: GG - AL4193

Series 4193 units in the “GG”, “HJ” and “HL” size (nominal rating 10, 20, 30 GPM) are designed for high-speed, heavy-duty service. The pump is connected by a flexible coupling with guard directly to a 50 HZ or 60 HZ motor. Both pump and motor mount on a sturdy formed steel base. This makes a very compact, rugged unit for heavy-duty service, handling many types of liquids up to 15,000 SSU (3,300 cSt).

*(Shown with the following options:
non-sparking aluminum guard,
drip rim, lift eyes, grounding lug)*

DIMENSIONS – HJ, HL SIZES – IEC FRAME M DRIVE (493)

Brackets are designed for IEC motors with B14 mounting face.

NOTE: Jaw type coupling with straight jaws recommended to facilitate assembly of motor and pump to bracket.

COUPLING IS GUARDED WITH PLATES OVER SIDE OPENINGS ON MOUNTING BRACKET.

- ① 56, 143T and 145T frame motors. (Available with "GG" size pump.)
- ② 56, 143T and 145T frame motors. (Available with "HJ" or "HL" size pumps.)
- ③ 182, 182T, 184, 184T frame motors. (Available with "HJ" thru "AL" size pumps.)
- ④ 213, 213T, 215, 215T frame motors. (Available with "HJ" thru "AL" size pumps.)
- ⑤ 254U, 254T, 256U, 256T frame motors. (Available with "AK" thru "AL" size pumps.)
- ⑥ Dimension includes motor block, base height is 1½".
- ⑦ Dimension includes motor block, base height is 2 15/16".

These dimensions are average and not for construction purposes. Certified prints on request.

PSH REQUIRED

Printed performance curves are not available.

Performance curves can be electronically generated with the Viking Pump Curve Generator on vikingpump.com.

NPSHR data is not available on the curve generator.

PSH (Net Positive Suction Head): The NPSH_R (Net Positive Suction Head Required by the pump) is given in the table below and applies for viscosities through 750 SSU. NPSH_A (Net Positive Suction Head – Available in the system) must be greater than the NPSH_R. For a complete explanation of NPSH, see Application Data Sheet AD-19.

FOR VISCOSITIES UP TO 750 SSU – See NPSH_R table below.

NPSH_R for high viscosities can be estimated using the following method:

1. Calculate line loss for a 1 foot long pipe of a diameter matching the pump inlet port size. Use your flow rate and max viscosity.
2. Convert this value into Feet of Liquid (S.G. 1.0)
3. Add this value to the NPSH_R value in the chart below.

PUMP SIZE	PUMPS SPEED, RPM						
	520	640	780	950	1150	1450	1750
GG	1.6	2.2	2.6	3.1	3.9	5.6	7.6
HJ, HL	2	2.8	3.4	4.5	6.2	9.5	13.5
AS, AK, AL	2.8	3.9	5.5	7.7	11.2	16.8	—

Note: NPSH_R – FEET OF LIQUID (Specific Gravity 1.0), Viscosities up to 750 SSU
